*Photobooth is reserved on a first come, first serve basis

Party Add-On: Educator + Activity Station

\$249

Activity Station Includes:

One educator and activity station set-up in your party room for the full 2-hours of the party, choice of theme below. With both themes children can bring their creations home at the end of the party!

- Our **Ramp it Up!** activity is inspired by the engineering design process “Think, Make, Try” and asks children to “Think” about how vehicles are made to accomplish different tasks, “Make” a prototype out of everyday materials, and “Try” it out on a ramp to see how it works!
- Our **Make Your Own Masquerade** activity dives into the world of imaginary play and asks children to explore elements of art, design, and storytelling by creating a mask and imagining how they or their character might be represented though it. Whether their imaginary world consists of reenacting events of daily life or weaving a fantastic tale they will engage their creativity, abstract thinking, and problem-solving skills.
